TACTICAL COMBAT CASUALTY CARE COURSE

The Tactical Combat Casualty Care (TCCC) course introduces evidence-based, life-saving techniques and strategies for providing the best trauma care on the battlefield. NAEMT conducts TCCC courses under the auspices of its PHTLS program, the recognized world leader in prehospital trauma education.

NAEMT's TCCC courses use the PHTLS Military textbook and are fully compliant with the Department of Defense's Committee on Tactical Combat Casualty Care (CoTCCC) guidelines. It is the only TCCC course endorsed by the American College of Surgeons.

The TCCC-MP (TCCC for Medical Personnel) course is designed for combat EMS/military personnel, including medics, corpsmen, and pararescue personnel deploying in support of combat operations.

NAEMT's TCCC courses are taught by a global network of experienced, well-trained instructors. To support course sites, instructors and students, NAEMT maintains a network of tactical affiliate faculty both in the U.S. and internationally, and staff at its Headquarters Office. Course administration is streamlined and cost-effective.

Almost 90% of American service men and women who die from combat wounds do so before they arrive at a medical treatment facility. This figure highlights the importance of the trauma care provided on the battlefield by combat medics, corpsmen, PJs, and even the casualties themselves and their fellow combatants. With respect to the actual care provided by combat medics on the battlefield, however, J. S. Maughon noted in his paper in *Military Medicine* in 1970 that little had changed in the preceding 100 years. In the interval between the publication of Maughon's paper and the United States' invasion of Afghanistan in 2001, there was also little progress made. The war years, though, have seen many lifesaving advances in battlefield trauma care, pioneered by the Joint Trauma System and the Committee on Tactical Combat Casualty Care. These advances have dramatically increased casualty survival. This is especially true when all members of combat units – not just medics – are trained in Tactical Combat Casualty Care (TCCC.)

casualty survival. This is especially true when all members of combat units – not just medics - are trained in Tactical Combat Casualty Care (TCCC.)

Combat medical personnel and non-medical combatants in U.S. and most coalition militaries are now being trained to manage combat trauma on the battlefield in accordance with TCCC Guidelines.

General Informations

Course Registration Fees: The course registration fees is 500 euro and includes: Registration to the TCCC program, TCCC manual, training equipment, live models, breakfasts and lunches.

We have to underline that the money of the registration of each student covers only the inelastic cost mentioned above, for participation to the Course.

The registration fee is non-refundable for failure of attendance to the Course.

For refund of your registration fees, cancellation of the participation to the Course must be effected one month before the commencing of the Course. At that time reading materials must also be returned in good condition.

Manual: Pre-reading of the Course materials is required in order to succeed to this Course.

Teaching Language of the Course: Both English and Greek

Meals during the Course: Breakfast and Lunch

Clothing Requirements: Military uniform.

Accommodation: Accommodation is not included in the registration fees. The instructor team will stay to E-Hotel that is very near to the training center. The cost is 70 euro per night per single room (this special price is given for the course participants only), if you are interested in reserving a room please inform us beforehand so as to arrange it for you.

Safety: The faculty team minimised the risks of the Course and ensures the safety of the participants. In the unlikely event of injury of any of the participants the faculty team will not be held responsible and will not cover any resulting medical costs. The participants are responsible of complying with the safety instructions of the faculty and preserve their physical integrity.
