

## Regulations

- Every team of each category (students, paramedics, medical-nurse) will consist of 4 persons. An additional member will be the observer and that member will not participate in any way. Team-ambulance crew must announce this to an organizer at start of task and before arrival on the task site these persons will leave the Ambulance and move according to instructions of organizers.
- The organizing committee will provide you with all the necessary equipment, an ambulance with a driver.
- In every task there will be 2 judges and a coordinator.
- The contest will involve 8 different tasks-scenarios. The evaluation time for every task-scenario will be 10 minutes. It begins by the first member of the team getting off the vehicle. When time is up, you must stop, get into your vehicle and leave the scene.
- It's very team's responsibility to be present at the proper time (time-schedule). You must strictly follow the time-limit that has been given to you. You should be present at the scenario scene at least 5 minutes prior to the set start time.
- In the case were you are not present in any of the scenarios of the contest you will not be excluded by the contest. If you are not present you will be evaluated with zero points at that particular task you missed, but you will be able to attend the following tasks.
- At the tasks there will be human models plus mannequins. You should be careful with your techniques. Respect is required both in relation to the models and the mannequins.

- Each team should carry their own flash light and protection glasses.
- You must wear your professional equipment at all times.
- Treat the scenario patient as a real life!!
- If the patient's vital functions parameters (heart rate, blood pressure, etc.) are not a part of task explanatory note, you will get them from the judge after examination of the patient. Vital signs should be consciously obtained by measurement on the patient.
- The value of heart rate is necessary to be measured at least 5 seconds by holding the finger at a. radialis or a. carotis externa.
- Blood pressure - it is not necessary to perform measurement of real BP, but you have to set the tonometer cuff on the arm and to have stethoscope prepared.
- Pulse oxymetry - it is allowed to use your own pulse oxymeter, the simulated value will be announced by judge.
- It is prohibited to ask about vital functions of the patient without examining him first!
- In every scene there will be coordinator/judge who will provide you with all the additional information in relation to the task patient.
- The usage of mobile phones or any other electrical devices during the task is forbidden.
- The usage of any written protocols during the task is forbidden.
- The consumption of alcohol or any illegal substances during the tasks is forbidden.
- Appeals against decisions of the judges can only be submitted in writing to the results committee within an hour of the announcement of the results and after the payment of 100 Euros has been made.
- If a team member is feeling unwell, he must report this directly to the organizing committee and he will be entitled to leave without be excluded from his team. The team will not be entitled to replace a member who resigned.

In the case of bad behavior or misconduct by a member or by the

entire team, the judge will be entitled to immediately terminate the task, to evaluate the team with zero points at that particular task and the organizing committee will decide whether to exclude, without refund, the team from this and / or future competitions.
